Advanced SQL – Fall 2012

Final Project – Reject Analysis for Prestige YoYo

Number of students per group: 3

Introduction

Prestige YoYo is interested in improving quality and increasing profits by automating their production facilities. The Process Control group has committed to doing the best they can to provide the data needed for analysis. A simulator will be provided to generate control and monitoring data. However, you must "negotiate" the requirements for the available data with the Process Control group (your instructor) to feed your application.

Milestones Date	Milestone
05 Nov 12	- Database Schema First Draft -Vendor Q&A Meeting (In-class)
12 Nov 12	- Database Implemented - Data Access Layer testing complete -Vendor Q&A Meeting (In-class)
